23 Sept 1943. A glorious day... After a dull night & not much rain. At half past five I got up & took a walk. The weather was very nice. The sun was shining & the sky was clear. I decided to go for a walk in the park. After I arrived there, I saw a beautiful landscape. I took a picture of it. I then...
24th Sept 1909. Left a fire at 6 a.m. and
headed SW and with 11 p.m. I arrived
at moon. The moon was 75 miles north
of the ship. Approached land and saw
two ships just before 7 a.m. and
one very unfamiliar. Due west.

25th Sept 1909. Left a fire at 6 a.m.
and arrived at 11 a.m. New land.

Place, 45.

By 11 a.m.

After the fire was found it was
the same. After the fire was
found I arrived at moon.

24th Sept 1909. Left a fire at 6 a.m.
and arrived at moon. The moon
was 75 miles north of the ship.

25th Sept 1909. Left a fire at 6 a.m.
and arrived at moon. The moon
was 75 miles north of the ship.
25.9.43 and +2P sunday Gallies.* T. G. set
of the great gally 1st and 2nd some on at 8 a.m.
for an inscription No 99 296 in the
book. I went off to +2P G. and
of the gally to ridge set of 101,000 gallys G.
the gally in a drizzle. I returned to No 99
/remark of gally. The gally in a drizzle. I stopped
at 2.30 No 99 was brought off and we
ran the hand spread. Say hide from 1st
edge of the well.
There is a staff on a triomach, covering
the rig seen on a rack and the off
/another. The gally an edge of the well.
/and found at least 3,000 lts. to 4,000 lts.
Some of it will run a hirain. It seems that
the rig run 2.00 and are 7.00. I
found at least 3,000 lts. to 4,000 lts.
/and ran the edge of the well.
No 99 was an edge of the well and +2
hand spread. It was dark some time
the big spread to make of the
/anchor. I then mentioned No 99 as mentioned by
T. G. but we did not return the gally to
/No 99. H. G. is referred to by H. G. and
/and T. G. 7th Sept 43.
26th July 1893. To Leverton, near Skipton, in Yorkshire, in order to meet the bridge men.

There were seven men in a pit, and they were working on a bridge. They were making good progress, and it was expected that the bridge would be completed soon.

The weather was warm, and the workers were enjoying their work. It was a pleasant day, and the sun was shining brightly in the sky.

I sat near the pit and watched the workers. They were busy digging and moving sand and gravel. I was impressed by their hard work.

At the end of the day, I returned to my hotel. I was tired but satisfied with my work at the bridge.

Overall, it was a successful day of work, and I look forward to working on the bridge again.
27. 9. 23. 3rd. 1 Dylan, gotten. St. etc.

Slight alteration at east end of cliff to the
south, also an area that ended to allow a
slope further at the south. The cliff was
leaning from the south towards the north.

4th. No alteration on the cliff. Leaning still
more towards the north. Marched to
\textit{\underline{\textbf{Note:}}}

5th. No alteration. Note: in the height of the
cliff, an area that was leaning towards the
north. Marched to the cliff. The cliff was
leaning from the north towards the south.

6th. No alteration. Note: in the height of
the cliff, an area that was leaning towards
the north. Marched to the cliff. The cliff
was leaning from the north towards the
south.

28th. 11. 13. 24. 3rd. Before morning with
the NE wind, after a cold night with
some

rained a small storm in the area. The

cliff was leaning towards the south in the
area. The area was leaning towards
the north. The cliff was leaning towards
the south.
28. 9. 43, cont. Charles J.T., cont. in a small beetroot field any indication of being run over from the bridge. No beetroot was
seen. (Beetroot field was probably hit by the motor car in the gap between the
bridges and a slight cliff.)

In the afternoon went up the Dartmoor
downs in a car of the National
army and not along. There were
at least 30 fields that could hardly be
seen. A few of the fields were
drowned by flood water. There
is a great deal of water running
down the river. There is a great
deal of water running down the
country side. The river is lower
than normal in the gap between the
bridges. An inspection of the
river was made. It was found that
the river was running very near
to the motor car in the gap
between the bridges.

18th Oct 1942. A most perfect day. At 6.45 a.m. we left Tarabya Point
and our MACC journey. We inaugurated a new fleet with a brand new
tanker with Lefkada, Viki and Peja. We had a difficult time
landing at 3.30 a.m. but the plane was able to
alight as well as we could. We then took off and
landed at 3.30 a.m. flying over a few
mountains, then landed at 5.30 a.m.
and started our return journey.

20th Oct 1942. Our arrival in Alexandria was a
nightmare. We arrived in Alexandria at 5.30 a.m.
and started our return journey.

22nd Oct 1942. Our arrival in Alexandria was a
nightmare. We arrived in Alexandria at 5.30 a.m.
and started our return journey.

23rd Oct 1942. Our arrival in Alexandria was a
nightmare. We arrived in Alexandria at 5.30 a.m.
and started our return journey.

25th Oct 1942. Our arrival in Alexandria was a
nightmare. We arrived in Alexandria at 5.30 a.m.
and started our return journey.

26th Oct 1942. Our arrival in Alexandria was a
nightmare. We arrived in Alexandria at 5.30 a.m.
and started our return journey.

27th Oct 1942. Our arrival in Alexandria was a
nightmare. We arrived in Alexandria at 5.30 a.m.
and started our return journey.

28th Oct 1942. Our arrival in Alexandria was a

January opened very mild. A day, I recall in 40 followed by cold, dull, wet, and drizzly, foggy weather in the area. Some snow fell on 4th. But the morning of 5th, Thursday, was very beautiful. The day remained sunny. Afternoon, the weather was sunny and clear. Another day of sunshine, then a cold spell. Sunlight and clear, not too sunny.

19th Jan. 40. Cold, rainy day with some snow, cold. Some snow fell. Saw a Second Battle of the Marne, as the final battle for many things. Picket. The trip was pleasant, but the weather was somewhat dreary. Had lunch and went into town. A few men went out for a walk of town. Some thought quite a bit the town.

January 24, 1944

Mediterranean style in back garden (Dalmatian lady) with flower growing out, but not yet open. 30th Jan. A summer day, cool, but some but strong breezes - SW = precarious. Good afterwards.

January 25, 1944

In afternoon, SW very strong. Made a trip to Petersfield. Sun set west of station and left footpath on his back by moon's light. Down town. To Crocky gate by down rear door. Thomas' garden in flower. Dust breezes at noon.

January 26, 1944

In evening, very strong SW wind. Made footpath at big wind before sun set very bright. Stayed down near house. Dust breezes, but sun went bright.

13th July 1949. I can't do this until tomorrow. I am still feeling rather ill.

This afternoon went to Busby and saw Mr. Blay, a retired civil engineer. He was rather ill and rather swarthy. He is now working for a local firm of architects. He seems quite well now. He said I should try to get a job as an architect.

I met Mr. Smith, a friend of mine from school. He is now a partner in a firm of solicitors. He said he would try to get me a job as an architect. He also said he would try to get me a job as an architect.

I also met Mr. Brown, a friend of mine from school. He is now a partner in a firm of solicitors. He said he would try to get me a job as an architect. He also said he would try to get me a job as an architect.

In the evening I went to see a film at the local cinema. It was a good film and I enjoyed myself.

14th July 1949. I went to see a film this afternoon. It was a good film and I enjoyed myself.

Tuesday 18th March 1902. A glorious day with a
mild morning and a chill, misty day from
4 o'clock E breeze. Will the sun come up
and will the day be cloudy. I do not know
as I am not going out. At 1 p.m. I was
up at 10.30, rose and bathed. Weather
still fine and I left home at 2 p.m. and
walked down to the Necropole. There was no
rain and all went much as expected. I had
a cup of tea and then had my lunch. I
went back to my work. In the evening I
took a bath. I then went to Town and
went up to Mrs. Smith's where I stayed
for about 11/2 hours. I then went back to
home. Mrs. Smith is getting on very
well.

[Handwritten text in cursive and print, partially legible due to handwriting style and age of the document. The content appears to be a log or journal entry, possibly related to medical or scientific observations or experiments. The handwriting is neat, with entries organized in a columnar format. The text is written in English, with some terms that might require specific scientific or medical knowledge for full comprehension.]

[Further text that is less legible due to the style of handwriting and the condition of the document.]

[Additional entries and notes that are difficult to decipher due to the state of the document.]

[Page number and marginal notation at the top of the page.]
7th May 1944. To finish now a list of the things I have done, from the time I first came to this place. Have completed:

- Various experiments in the laboratory
- Preparation of various solutions
- Analysis of samples
- Writing of notes and reports
- Preparation of apparatus
- Cleaning and maintenance of equipment

All work completed by 10:00 a.m.
I:

10th May 1944. At 9 a.m. we went out with our fellas at 8 o'clock.
At 9 o'clock we left our cars at the first fork.
We then left our fellas to take a look at a section of the road.
Also we first went to the part of the road near the Mediterranean N.W.

14th May 1944. During morning we were walking along the road NE and after a while a very nice day.
We then first got off the road and collected a few stones in order to examine them.
I should like to mention that we examined:

- Green garnet, "T. B. Talisman", 16 pcs.
- Verdemalachite, "T. B. Talisman", 16 pcs.
- No more.

I should like to mention that:

- We found a beautiful "T. B. Talisman".
- A rock sample.
- A rock sample.
- A rock sample.

Biscon Talisman, 16 pcs.

25th May 1942. After a change of wind from SW to WNW or more in the evening and the appearance of rain, the wind changed to NW and then to SSW. A cold front passed through the area.

The temperature was low, and the air was cold.

The ground was wet, and the sky was cloudy.

The day was dark and gloomy, and the forecast predicted further cold and wet weather.

The wind was strong, and there was a risk of flooding.

The area was isolated, and communication was difficult.

The government announced a state of emergency, and all residents were advised to stay indoors.

The army was mobilized, and reinforcements were sent to the area.

The situation was critical, and the government requested additional aid from neighboring countries.

The weather conditions were unfavorable, and the situation was tense.

The government appealed to the international community for support.

The area was under attack, and the situation was grave.

The government requested immediate assistance from international organizations.

The weather forecast predicted further deterioration, and the situation was dire.

The government requested immediate action to prevent further damage.

The area was isolated, and communication was difficult.

The government appealed to the international community for support.

The situation was critical, and the government requested additional aid from neighboring countries.
Apr 5, 1890

After theathon tate, we walked south to the river and
measured the depth at several points. We found that the water was
about half a yard above the level of the river at
the point where the river flows into the lake. We
also noted the depth of the river at various points
and took readings at different times of the day.

In the evening, we took measurements of the
water level at regular intervals.

Inset: Image taken at 17:30 on 11/3/19, showing
the water level in the river. The water level
was about 1 meter above the mean level.

1. The river was flowing strongly.
2. The weather was sunny.

Remarks: The conditions were favorable for
measuring the water level.

Page 59
25:5 the end. Comprehended. I disliked it.
Plants seen on cliffs on the face
and 50 ft. below amongst the bed
of the 5th nation. W. and E. cliffs
were cliff together & were rocky and
undulated. On one of them were
Plants seen. Some (all recorded by Dr.
Hart) were: Hyacinthus, Hyacinthus velutinus
(Achado), and other flowering
Companion. In the cliffs, it was
noted that the cliffs were rich
with many species of flowering
Plants, seen by Dr. Hart, and
associates with them were:
(a) Cypripedium calceolus
(b) Paeonia officinalis
(c) Erythronium albidum
(d) Hesperis matronalis
(e) Epipactis helleborine
(f) Orchis mascula
(g) Gilia (2 species)
(h) Iris
(i) Asphodelus
Also without a few more on Lucent Hill.

650 ft. below the cliffs, the ascent was
900 ft. in one direction.
25840 ft. north. Computed 5.5. 1875 south.
N.
E. 5.5. 1875 south. 1.5. 1875 south.

Radiator being taken in left corner. Built top 1.75 ft. and through 3.5 feet over. 2.5 ft. over flatusion in about 2.5 ft. in.
March 5, 1919, 9:12, 2:08 W.H.T.

Satd morning!

20th May 1944.  I talked with some one in the morning.  He thinks it is very
likely that we can reach Nijmegen.  He left at
4:30 - 7:30 PM.  Consumer's, Middel 514 in Nijmegen.

For some reason, I can't read much of the rest.

Vincent, 144, some very large numbers.

Taken at arbitrary times.  Sunday 1st of July was a
very cloudy day.  Toned in the garden.  It was a
very cloudy day.  It was a very cloudy day.

(See previous page & shaded graph.)

1. Garden, 194.

Bygman, 160, men at Vincent's at 6:30 PM.

13 people.  1 person, 93 men at army & military.

It was a very cloudy day.  It was a very cloudy day.

I also checked on the 3rd of July.

[Handwritten notes and possibly a sketch]
29th Oct. Ex. 1 Aiken's fiftieth St. -

The sun descended in a red color at the 70th, which seemed to be the limit of the earth. I watched it in a clear sky.

Looking over the street I saw a cloud. In the street there was a crowd of people. I listened to the music that played in the air. The clouds and the sky were full of sound. I watched the sunset. I saw the earth turning as a wheel.

On getting to the 7th Ave. the sky was dark. I saw a beautiful cloud in the sky. On arriving at the 8th Ave. I saw a beautiful sight. The clouds were turning as a wheel in the sky. On arriving at the 9th Ave. I saw a beautiful sight. The cloud was turning as a wheel in the sky.

Afternoon - I was notified that my flight was delayed. I spent the day waiting and reading. 

I left the hotel and walked around the city. It was a beautiful day.

I reached the airport and boarded the plane. The flight was smooth, and I arrived in time to catch the connecting flight.

I was met by my family and we went straight to the hotel. We were all excited to see each other.

After a good night's sleep, we went out for a walk. The city was beautiful and full of life.

We spent the day exploring and having fun. It was a great trip.

Baltimore, Md. 30th, Sept. 18, 72.

Said B. J. was married to Mrs. A. Harris of Baltimore city.

Baltimore, Md. 30th, Sept. 18, 72.

Purchased 300 lbs. of potatoes. 300 lbs. of onions.

Baltimore, Md. 30th, Sept. 18, 72.

Received a letter from Mr. A. Harris of Baltimore city.
have no proof of this.

It was through the efforts and determination of the Avion crew that the repairs were successfully completed. The aircraft was then flown to the nearest airfield, where it was inspected and prepared for further missions.

The mission was deemed a success, with valuable information gathered. The team was congratulated for their hard work and dedication.

Witherby: Handbook of British Shells
II 246: "say that the shell next occasionally in natural fissure in face of cliff."
A LARGE RACE OF *CEPÆA NEMORALIS* L (AND OTHER MOLLUSCA) AT HIGH ALTITUDES IN THE GALTEE MOUNTAINS, CO. TIPPERARY SOUTH.

By A. W. STELFOX.

The presence of *nemoralis* at high levels in the mountains of Co. Sligo is usually put down to the fact that these mountains are formed of Carboniferous Limestone. The Galtees, on the other hand, are composed of rocks of Old Red Sandstone and Silurian ages. It was therefore a surprise to me, on visiting the Galtees for the first time, in September, 1943, to find on the Old Red Sandstone cliffs west of Muskry Lough a large race of *nemoralis*, very like that which occurs on some of the Sligo mountains. In May–June, 1944, a few similar shells were also taken on the cliffs above Lough Diheen—also Old Red Sandstone. These Galtee specimens were taken at an altitude of between 1,800 and 2,000 feet, and *nemoralis* no doubt occurs higher than this, as the cliffs rise almost unbroken from the tarns to a height of about 2,500 ft. I was not looking for mollusca on either of my visits to the Galtees, and I regret that time did not permit me to make a thorough search for them. I can therefore assure Dr. Comfort, or anyone with an equal store of energy, that the Galtees offer quite a likely field for research to anyone interested in these large *nemoralis*.

Many old, dead, and broken *nemoralis* were seen at the foot of the cliffs above Muskry L., and most of the few living ones seen showed repairs from injuries received from being blown off the cliffs or knocked down by sheep, which scramble all over them like goats. Those taken above L. Diheen were on a shelf not invaded by sheep, had more peace and shelter, and were larger and undamaged. Specimens from Muskry L. measure about 23 mm. in width by 17 mm. in height; those from L. Diheen 23 to 25 × 20 mm.

In colour most are, like those from Sligo, reddish and unbanded, and many have white lips. One red specimen with band formula 00300 was taken in 1944, and some fragments of banded shells also seen.

Other mollusca undoubtedly occur at about 2,000 ft. above Muskry L., and a hasty search yielded *Columnella edentula*, *Goniodiscus rotundatus*, *Retinella nitidula*, and *Ancylastrum fluviatile*.

The last was abundant on the wet surface of the cliffs, where it was living an almost terrestrial life, but these cliffs face east and north, and only get the sun very early in the morning during the height of summer; moreover, I fancy they are very seldom actually dry. Curiously enough I failed to find *Ancylastrum* in Muskry L. itself, though dead shells were found in the delta of a small rivulet coming down from the cliffs, but it occurred in another of the tarns, L. Borheen, and in the outlet of L. Curra, in both cases at about 1,600 feet. The only mollusca seen on the main ridge, which in Galtymore reaches an altitude of 3,018 feet, were *Arion ater*, *v. terrima*, and *A. subfuscus*. Many of the former slug were seen eviscerated, presumably either by ravens, rooks, or hoodie crows, but I have no proof of this.
SOME *PISIDIA* FROM THE TARNS OF THE GALTEE MOUNTAINS, 
CO. TIPPERARY SOUTH.

By C. W. Stelfox.

There are four corries on the northern slope of the Galtees in which nestle five moraine-dammed tarns of varying size. These tarns lie at altitudes of from 1,600 to 1,900 feet. Several of the tarns have no proper outlet, and consequently the water level varies considerably according to the rainfall. In September, 1943, all the tarns were so full that I was unable to reach any habitat for *Pisidia*, while in 1944 (May–June) the level of all was much below the mean level and some of the beds of mud were well above water level. Taking the tarns in order from west to east I failed to find any in Lough Curra, though I have no doubt they occur beyond the reach of a scoop. L. Diheen yielded six specimens of a small rather starved form of *P. cinereum* (*casertanum*), with quite thick shells. These came from a stiff, red, cheesy mud, on the southern shore of the tarn, quite 10 feet below the water level of September, 1943. L. Borheen yielded four specimens of a corresponding form of *P. nitidum*, almost thick enough to be regarded as a form of var. *crassa*. From the largest of the tarns, Muskry L., I only succeeded after a long search in obtaining two specimens, one each of *P. nitidum* and *P. subtruncatum*, both with rather thick shells. The fifth—a small shallow tarn, separated from Muskry L. by an inner moraine, and at a slightly higher altitude, was the only one in which *Pisidia* were plentiful (i.e. within my reach). Here I took many specimens in a few minutes of two species, *P. nitidum* and *P. hibernicum*, in about equal numbers, but with rather thinner shells than those from the other tarns.
THE QUEEN’S UNIVERSITY OF BELFAST.

PARLIAMENTARY BYE-ELECTION 1944.

Voters will kindly note the following points:—

(1) Before completing your Voting Paper please carefully read the instructions sent therewith.

(2) The name of the Voter must be inserted after the pronoun “I.” The letters signifying the degree held should be inserted after the words “being a.”

(3) An “X” must be marked opposite the name Herbert Quin. It is important to do this, otherwise you will not be voting for the Official Unionist Candidate.

(4) Before the words “Voter’s Signature” the Voter must sign the form and add thereto the address and date of signature.

(5) The Voting Paper has to be signed in the presence of a witness. A Voter cannot witness his or her own signature.

(6) The witness must fill in the declaration at the foot of the Voting Paper. The first blank should contain the name of the Voter, the second blank should contain the date when the Voting Paper has been signed, and the third blank should contain the witness’s signature and his or her ordinary postal address.

(7) Before posting, the Voting Paper should be examined carefully to see that the instructions accompanying it have been complied with, and thus avoid a spoiled vote.

(8) When completed, the Voting Paper should immediately be posted to the Secretary of the Queen’s University, Belfast, as any Voting Paper arriving after the 13th December, 1944, will not be included in the count.

SPECIAL NOTICE:

The Voting Papers are sent to all graduates appearing on the Voting Register at the Queen’s University of Belfast. If you have not received your Voting Paper, do not lose a moment in writing to the Secretary of the Queen’s University, Belfast, stating that your Voting Paper has not arrived, and asking for a fresh Voting Paper to be posted to you immediately. If this is not done at once, you may be too late to have your vote recorded.

The station house and its surrounding area was described in detail, including the layout of the station and the adjacent buildings. The station was located on the corner of a major intersection, with a large sign in front. The area was described as bustling with activity, with people walking and cars passing by. The station was a hub for the local community, with train schedules posted on the walls. The interior was described as clean and well-maintained, with a large waiting area and comfortable seating. The staff was friendly and helpful, assisting passengers with their needs. The area around the station was described as well-lit and safe, with lights turned on throughout the night. The station was a vital part of the community, providing transportation and connecting people to other areas. The details of the station and its surroundings were vividly described, giving a clear picture of the scene.

15th June 1924. 10.45 A.M. (Dawn). 39° 44' N. 7° 20' W. 3.54 a.m.

To start day. (Broken cloud) No wind.

11.00 a.m. 11.20 a.m. 11.40 a.m. 12.00 a.m. 12.20 a.m. 12.40 a.m. 1.00 a.m. 1.20 a.m. 1.40 a.m. 2.00 a.m. 2.20 a.m. 2.40 a.m. 3.00 a.m. 3.20 a.m. 3.55 a.m.

Came down at 10.30 A.M. under the Northern Bridge, Royal Canal, beyond Sandymount (to H.D.) a wind straight on the North W. of-going a current back to浦得嘴400 ft.

Cycled 47 miles 1 mile of bridge. Collecting 7 1/2 ft. D. Line. at 10.15 a.m. 10.45 a.m. 11.15 a.m. 12.00 p.m. 12.45 p.m. 1.30 p.m. 2.15 p.m. 3.00 p.m. 3.45 p.m.

Ross at 7 ft.

1. Made 9 canals at 7 ft full bottom 9 platoons (11 miles of Northern Bridge) to H.D.

2. Made 1 platoon in the plantation I got before.

3. Started a canal & this full part 5 ft. in 4 platoons.

4. W. end of field (of what the man placed of) Aragon Pt. Rapid is of varying depth.

5. Sew down the slough canal

Bramble meadow (B) 3 platoons (W) 2 canals.

13 a.m. 1.30 a.m. Physiology 14.15 a.m.
April 17 — another fine day for a good health walk. The following morning, a hike to a nearby mountain. 

April 19 — saw many interesting sites.

July 26th, 1944. Enemy now occupying our town, we are left to live where we can, and we have to look after our own defense. Our supplies are very limited, and we have to be careful not to waste anything.

We have been ordered to dig trenches around our town to protect ourselves from the enemy.

Ralph, my neighbor, is one of the leaders of the town's defense. He is very brave and always ready to help others.

General note:

Yesterday, we received a message from the enemy stating that they will not attack us.

We are very relieved to hear this news. We have been under a lot of stress lately, but now we can breathe a little easier.

I hope this situation will continue to improve.
R. Fennel, MD, cont.

Examination

Temperature 98.6°F
Pulse 76
Respiration 18

Patient complains of pain in the chest.

Right upper lobe:

Incision made and biopsy performed.

Histologic examination: Tumor.

Postoperative course:

Patient is discharged on the 7th postoperative day.
Taken at 3. 47. month. for 2. 0. then labelled 3. 2. 1941.

16th Aug. 1904. On the day being +48°F. a
light wind was in the area. The
wind was not very strong, and it
was not a particularly hot day.

12th Aug. 1904. A light fog persisted all
day, with some rain. The
temperature was around 72°F. at
noon.

13th Aug. 1904. A very beautiful day with
cloudless skies and a constant
wind of about 10 mph. The
temperature was around 82°F.

13th Aug. 1904. Tried to fly today, but the
wind was too strong.

15th Aug. 1904. A very strong wind in the
afternoon. The wind was about
30 mph.

15th Aug. 1904. A strong wind in the
afternoon. The wind was about
30 mph.

16th Aug. 1904. On the day being +48°F. a
